

Stop the promotion of suicide to the medically and emotionally vulnerable.

To our State Legislators and all Public Officials:

Dear Lawmakers: Please prohibit the manipulation, cajoling and promotion of suicide to the medically and emotionally vulnerable. These people need care and involvement, not killing. It is universally recognized by psychologists worldwide that depression's #1 indicator is the expression of suicidal thoughts. But such depression is treatable!

Elizabeth Kubler-Ross' widely recognized principles of The Five Stages of Emotional Trauma were based upon being given a terminal diagnosis. It is the likely response of all of us! Kubler-Ross expressly condemned the action of assisting a suicide, as it was the opposite of Acceptance and is merely an open surrender to the emotionally stultifying feelings of Denial/Anger/Bargaining/Despair.

Please stand against this insidious dismissal of human lives.
